

**Monterey County Business Council
Eggs & Issues Breakfast**

EGGS & ISSUES

What is "Eggs & Issues?" It is a gathering of interested persons from business, professions, government, and not-for-profits that are concerned about key issues affecting the economic health of Monterey County and are looking for solutions.

Please join us for a morning of engaging discussion on the movement to
Repair California through a limited Constitutional Convention.

In response to a budgetary crisis, several prominent individuals and political organizations began calling for a new constitution. A coalition calling itself "Repair California" was formed in 2009 to continue the push for a California constitutional convention. The plan is to obtain the two-thirds majority vote in the legislature and place a new constitution on the ballot for the November 2010 election. Repair California states that a consensus is emerging to reform: The structure of governance, particularly the legislative and executive branches, the processes for initiatives and referenda; Campaign finance, Term limits, changing to the two-thirds requirement for passing a budget, Revenue distribution, particularly between localities and the state. The full scope Convention is intended to preserve the parts of the current Constitution that are working and to restructure and modernize the other parts. Come and learn more about the movement.
